

# TFHS Alumni Profile

## Elizabeth Raffin

### **Cohort:**

2014-2019

### **HSC Subjects:**

English Advanced, Physics, Chemistry, Engineering Studies, Mathematics Advanced, Mathematics Extension 1, Food Technology

### **Extracurricular activities:**

School Captain, School Concert Band, SRC, Zone Swimming, Netball Team

### **What are you doing now alongside Forest?**

I am a 4th year student of Renewable Energy Engineering (Honours) at UNSW where I am currently starting my thesis. I work for the university running solar car workshops with high school students and I am just starting an internship at the Carbon Reduction Institute (CRI) to complete my industrial training.

### **What is a fond memory you have of Forest?**

My favourite memory of Forest was being in Mr Shaw's maths class, for 4 years in a row. He used to tell me off for eating in class, being late and not doing my homework. One time he even called me the dying wildebeest at the back of the pack. Now he refers to me as one of his "star pupils".

### **Describe your ongoing relationship with the school**

I currently work at the school one day a week and have done so since I graduated in 2019. I

have a very positive relationship with the school and I love hearing about what the SRC are doing and all the new initiatives. I like working at the school so much that I've almost been convinced to do a Masters of Teaching once I graduate (I haven't decided yet, but might come back to it later on). Unfortunately I will have to leave the school some time next year once I graduate to go travelling and looking for a graduate engineering role.
